PRODUCT FEATURES

The short path from Halogen to LED: With the new LED retrofits, car lighting can be upgraded to the latest LED technology. The new LED retrofits offer exceptional brightness and thanks to optimized light distribution there is more light on the road where it is needed. A longer service compared to halogen bulbs makes the LED retrofits attractive for all car drivers. The stylish look with a cool white beam gives the customers a day light effect in the night and more comfort and joy while driving. Our new portfolio offers a comprehensive range of applications, including high and low beam headlights, and fog lights and a high coverage of various vehicles.
